FCAT Sample Test Materials

These sample test materials are designed to help you prepare to answer FCAT questions. These materials introduce you to the kinds of questions you will answer when you take the FCAT and include hints for responding to FCAT questions. The FCAT Mathematics sample test materials for Grade 4 are composed of the books described below:

- Sample Test Book**
Includes a mathematics sample test, a sample answer sheet, and instructions for completing the sample test. (Copies are available for all students in the tested grade.)
 - Sample Answer Key**
Includes answers and explanations for the questions in the sample test. (Copies are available for classroom teachers only.)

Taking the FCAT Mathematics Sample Test Page 2

This section introduces the FCAT Mathematics Sample Test. It includes hints for answering FCAT Mathematics questions and an estimate of the time required to complete the sample test.

FCAT Mathematics Sample Test Page 3

The Mathematics Sample Test consists of 15 practice questions that are similar to questions on the FCAT. It includes a perforated (tear-out) Mathematics Sample Answer Sheet found on page 4.

Hints for Taking the FCAT Mathematics Test

Here are some hints to help you do your best when you take the FCAT Mathematics test. Keep these hints in mind when you answer the sample questions.

- ✓ Read each problem carefully and think about ways to solve the problem before you try to answer the question.
- ✓ Answer the questions you are sure about first. If a question seems too difficult, skip it and go back to it later.
- ✓ Be sure to fill in the answer bubbles correctly. Do not make any stray marks around answer spaces.
- ✓ Think positively. Some problems may seem hard to you, but you may be able to figure out what to do if you read each question carefully.
- ✓ When you have finished each problem, reread it to make sure your answer is reasonable.
- ✓ Relax. Some people get nervous about tests. It's natural. Just do your best.

Directions for Taking the Mathematics Sample Test

The questions in this Sample Test are called multiple-choice questions. A **multiple-choice question is followed by several answer choices**. Read all the answer choices under each question and decide which answer is correct. On the answer sheet, fill in the bubble for the answer choice you think is correct for each multiple-choice question.

This Sample Test contains 15 questions. It should take about 15 to 20 minutes to answer all the questions. You will mark your answers on the Mathematics Sample Answer Sheet found on page 4 of this book. If you don't know how to work a problem, just ask your teacher to explain it to you. Your teacher has the answers to the sample test questions.

Calculators and rulers are NOT to be used on the Mathematics Sample Test.
